V. RISK FACTORS

1. Standard Risk Factors:

a. Standard Risk Factors for investments in Mutual Fund

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down depending on the various factors and forces affecting the capital markets and money markets.
- Past performance of the Sponsor /AMC/Mutual Fund does not guarantee future performance of the scheme.
- The name of the scheme does not in any manner indicate either the quality of the scheme or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs.100000/- made by it towards setting up the Fund.
- The present scheme is the first scheme being launched under its management.
- The present Scheme are not guaranteed or assured return Scheme.

b. Risk factors of not maintaining average AUM of Rs. 20 crore on half yearly rolling basis (Applicable only for open ended debt oriented schemes)

c. Risks associated with different derivative strategies

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. As and when the Scheme trade in the derivatives market there are risk factors and issues concerning the use of derivatives that investors should understand.

Derivative products are specialized instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counter party”) to comply with the terms of the derivatives contract.

The specific risk factors arising out of a derivative strategy used by the Fund Manager may be as below:

- Lack of opportunity available in the market;
- The risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

- **Risks associated with Covered Call Strategy:**

The risk associated with covered calls is the loss of upside, i.e. if the shares are assigned (called away), the option seller forgoes any share price appreciation above the option strike price.

The Scheme may write covered call option only in case it has adequate number of underlying equity shares as per regulatory requirement. This would lead to setting aside a portion of investment in underlying equity shares. If covered call options are sold to the maximum extent allowed by regulatory authority, the scheme may not be able to sell the underlying equity shares immediately if the view changes to sell and exit the stock. The covered call options need to be unwound before the stock positions can be liquidated. This may lead to a loss of opportunity or can cause exit issues if the strike price at which the call option contracts have been written become illiquid. Hence, the scheme may not be able to sell the underlying equity shares, which can lead to temporary illiquidity of the underlying equity shares and result in loss of opportunity.

The writing of covered call option would lead to loss of opportunity due to appreciation in value of the underlying equity shares. Hence, when the appreciation in equity share price is more than the option premium received the scheme would be at a loss.

d. Other risk factors

i. **Concentration Risk:**

The Old Bridge Focused Equity Scheme seeks to generate long term capital appreciation/ income by investing in equity & equity related instruments of up to 30 companies. This concentrated nature of the portfolio may result in higher levels of volatility vis-à-vis other diversified equity-oriented schemes. Since the scheme will invest in not more than 30 stocks, it is also expected to have higher market liquidity risk compared to a regular diversified equity scheme.

ii. **Risk associated with schemes investing in equities:**

- The scheme proposes to invest in equity and equity related instruments. Equity instruments by nature are volatile and prone to price fluctuations on a daily basis due to both micro and macro factors. The value of Equity and Equity related instruments may fluctuate due to factors affecting securities market such as volume and volatility in equity markets, interest rates, currency exchange rates, changes in law/policies of the Government, taxation laws, political, economic or other developments, general decline in the Indian Markets which may have an adverse impact on individual securities, a specific sector or all sectors. Consequently, the NAVs of the Units issued under the Scheme may be adversely affected.
- Investments in equity shares and equity related instruments involve a degree of risk and investors should not invest in the Scheme unless they can afford to take the risks.
- Investors may note that AMC/Fund Manager's investment decisions may not be always profitable. Although it is intended to generate capital appreciation and maximize the returns by actively investing in equity/ equity related securities and utilising debt and money market instruments as a defensive investment strategy.
- While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. and may lead to the Scheme incurring losses till the security is finally sold.
- Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The NAV of the Scheme can go up and down because of various factors that affect the capital markets in general.
- Securities which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges
- Further, the volatility of medium / small - capitalization stocks may be higher in comparison to liquid large capitalization stocks.

iii. **Risk Associated with Investing in Fixed Income / Money Market Instruments:**

- **Interest-Rate Risk:** Fixed income securities and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest, credit quality, demand and supply. However, in case of Government securities credit risk remains zero, their prices are influenced by the movement in interest rates in the financial system.

In case of floating rate instruments, an additional risk could arise because of changes in spreads of floating rate instruments. With increase in spread of floating rate instruments, the price can fall and with decrease in spread of floating rate instruments, the prices can rise. Moreover, the floating rate instruments having a periodical interest rate reset carry lower interest rate risk compared to a fixed rate debt security. However, in the falling interest rate scenario, the returns on floating rate debt instruments may not be better than those on fixed rate debt instruments.

- **Credit Risk:** This risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer/instrument goes down. Different types of securities in which the scheme(s) would invest as given in the scheme information document carry different levels and types of risk. Accordingly, the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds which are AAA rated are comparatively less risky than bonds which are AA rated.
- **Re-investment Risk:** This refers to the interest rate risk at which the intermediate cash flows received from the securities in the Scheme including maturity proceeds are reinvested. Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the debt security. Consequently, the proceeds may get invested at a lower rate.
- **Basis Risk:** During the life of a floating rate security or a swap, the underlying benchmark index may become less active and may not capture the actual movement in interest rates or at times the benchmark may cease to exist. These types of events may result in loss of value in the portfolio.
- **Spread Risk:** In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.
- **Liquidity Risk:** The liquidity of a bond may change, depending on market conditions leading to changes in the liquidity premium attached to the price of the bond. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio.
- **Liquidity Risk on account of unlisted securities:** The liquidity and valuation of the Scheme investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment. The unlisted security can go down in value before the divestment date and selling of these securities before the divestment date can lead to losses in the portfolio.
- **Settlement Risk:** Fixed income securities run the risk of settlement which can adversely affect the ability of the fund house to swiftly execute trading strategies which can lead to adverse movements in NAV.
- **Other Risk:** In case of downward movement of interest rates, floating rate debt instruments will give a lower return than fixed rate debt instruments.

iv. **Risk Factors Associated with Securities Lending:**

As with other modes of extensions of credit, there are risks inherent to securities lending. During the period the security is lent, the Scheme may not be able to sell such security and in turn cannot protect from the falling market price of the said security. Under the current securities lending and borrowing mechanism, the Scheme can call back the securities lent any time before the maturity date of securities lending contract. However, this will be again the function of liquidity in the market and if there are no lenders in the specified security, the Scheme may not be able to call back the security and in the process, the Scheme will be exposed to price volatility. Moreover, the fees paid for calling back the security may be more than the lending fees earned by Scheme at the time of lending the said security and this could result in loss to the Scheme. Also, during the period the security is lent, the Fund will not be able to exercise the voting rights attached to the security as the security will not be registered in the name of the Scheme in the records of the Depository/issuer.

v. **Risk associated with Investments in REITs and InvITs:**

- **Price-Risk or Interest-Rate Risk:** REITs & InvITs run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- **Credit Risk:** In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. REITs & InvITs are likely to have volatile cash flows as the repayment dates would not necessarily be pre-scheduled.
- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. As these products are new to the market they are likely to be exposed to liquidity risk.
- **Reinvestment Risk:** Investments in REITs & InvITs may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- **Risk of lower than expected distributions:** The distributions by the REIT or InvIT will be based on the net cash flows available for distribution. The amount of cash available for distribution principally depends upon the amount of cash that the REIT/ InvITs receives as dividends or the interest and principal payments from portfolio assets.

The above are some of the common risks associated with investments in REITs & InvITs. There can be no assurance that investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

vi. **Risks associated with segregated portfolio:**

- Liquidity risk – A segregated portfolio is created when a credit event / default occurs at an issuer level in the scheme. This may reduce the liquidity of the security issued by the said issuer, as demand for this security may reduce. This is also further accentuated by the lack of secondary market liquidity for corporate papers in India. As per SEBI norms, the scheme is to be closed for redemption and subscriptions until the segregated portfolio is created, running the risk of investors being unable to redeem their investments. However, it may be noted that, the proposed segregated portfolio is required to be formed within one day from the occurrence of the credit event.
- Investors may note that no redemption and subscription shall be allowed in the segregated portfolio. However, in order to facilitate exit to unit holders in segregated portfolio, AMC shall list the units of the segregated portfolio on a recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests. For the units listed on the exchange, it is possible that the market price at which the units are traded may be at a discount to the NAV of such Units. There is no assurance that an active secondary market will develop for units of segregated portfolio listed on the stock exchange. This could limit the ability of the investors to resell them. There may be possibility that the security comprising the segregated portfolio may not realize any value.
- Valuation risk - The valuation of the securities in the segregated portfolio is required to be carried out in line with the applicable SEBI guidelines. However, it may be difficult to ascertain the fair value of the securities due to absence of an active secondary market and difficulty to price in qualitative factors.

vii. **Risks associated with investing in Tri-party Repo (TREPS) through CCIL:**

The Mutual Fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India Limited (CCIL). All transactions of the Mutual Fund in government securities and in Tri- party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The Mutual Fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time i.e. in the event that the default waterfall is triggered and the contribution of the Mutual Fund is called upon to absorb settlement/default losses of another member by CCIL, the Scheme may lose an amount equivalent to its contribution to the default fund. Further, it may be noted that CCIL periodically prescribes a list of securities eligible for contributions as collateral by members. Presently, all Central Government securities and Treasury bills are accepted as collateral by CCIL. The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral.

viii. **Performance Risk:**

Performance risk refers to the risk of a scheme being unable to generate returns matching / above the returns of the scheme's benchmark. It would also mean the scheme underperforming against its peer set of other mutual fund schemes having similar portfolios, scheme classification, objective, benchmark and asset allocation. These risks could arise due to a variety of market and economic activities, government policies, global economic changes, currency fluctuations, tax policies, political changes, corporate actions and investors' behaviour.

ix. **Risks associated with 'Restriction on Redemption in Mutual Funds':**

Subject to the approval of Board of Directors of the AMC and Trustee Company and immediate intimation to SEBI, a restriction on redemptions may be imposed by the Scheme under certain exceptional circumstances, which the AMC / Trustee believe that may lead to a systemic crisis or event that constrict liquidity of most securities or the efficient functioning of markets. Please refer to the paragraph "Restrictions, if any, on the right to freely retain or dispose of Units being offered" for further details including the procedure to be followed while imposing restriction on redemptions.

x. **Risks Factors associated with transaction in Units through stock exchange(s):**

In respect of transaction in units of the Scheme through stock exchange platform(s), allotment and redemption of Units on any Business Day will depend upon the order processing / settlement by the stock exchange(s) and their respective clearing corporations on which the Fund has no control.

xi. **Risks associated with investments in mutual fund units:**

To the extent of the investments made by the scheme in mutual funds units, the risks associated with investing in such funds like market risk, credit & default risk, liquidity risk, redemption risk including the possible loss of principal; etc. will exist.

xii. **Risk associated with investing in foreign securities:**

- Subject to necessary approvals and within the investment objectives of the Scheme, the Scheme may invest in overseas markets which carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, repatriation of capital due to exchange controls and political circumstances.

- Since the Scheme would invest only partially in foreign securities, there may not be readily available and widely accepted benchmarks to measure performance of such Scheme. To manage risks associated with foreign currency and interest rate exposure, the Fund may use derivatives for efficient portfolio management and hedging and portfolio rebalancing and in accordance with conditions as may be stipulated under the Regulations and by RBI from time to time.
- Investment in Foreign Securities involves a currency risk. To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.

Keeping in mind the investment limit in foreign securities currently applicable to Mutual Fund, In terms of Para 12.19 of SEBI Master Circular on Mutual Funds dated May 19, 2023, if overall limit for the Mutual Fund in overseas securities reaches USD 1 billion or the overall limit for Mutual Fund Industry in overseas securities reaches USD 7 billion, then Mutual Fund will not be able to invest in overseas securities / will not be able to do incremental overseas investment, unless such limit is increased or further directions is received from SEBI or RBI in this regard. It may be noted that the cap of USD 1 billion will be monitored and enforced at the Mutual Fund level and not at the individual scheme level.

RISK CONTROL/ RISK MANAGEMENT STRATEGY

Risk is an important part of the investment functions. Effective Risk Management is critical to Fund Management for achieving financial goals. Investments made by the Scheme shall be made in accordance with Investment Objective of the Scheme and provisions of SEBI (Mutual Funds) Regulations.

The Fund has identified following Risk and designed Risk Management Strategies, which is the part of the Investment Process to manage such risks.

Risk Associated with Equity & Equity Related Instruments

Type of Risk	Risk Mitigation Measures
Volatility	By monitoring sector / company exposure at portfolio level.
Concentration	By diversifying across stocks / sectors, concentration risk can be reduced. The fund manager will endeavour to build well diversified portfolio within the overall fund specific investment strategy which will help in controlling concentration risk.
Liquidity	The fund manager will control the liquidity at portfolio construction level.
Derivatives Risk	The fund has provision for using derivative instruments for portfolio balancing and hedging purposes. Investments in derivative instruments will be used as per regulatory guidelines. The fund will endeavour to maintain adequate controls to monitor the derivatives transactions entered into.

Foreign Account Tax Compliance Act and Common Reporting Standards requirements

As a part of various ongoing tax and regulatory developments around the globe [e.g. information exchange laws such as Foreign Account Tax Compliance Act ('FATCA') and Common Reporting Standard ('CRS')], financial institutions like Old Bridge Mutual Fund ('Old Bridge MF' or 'the Fund') are being cast with additional investor and counterparty account related due diligence requirements.

The Central Board of Direct Taxes (CBDT) has notified Rules 114F to 114H, as part of the Income-tax Rules, 1962, which Rules require Indian financial institutions such as the Banks, Mutual Funds, etc. to seek additional personal, tax and beneficial owner information and certain certifications and documentation from all our investors and counterparties. According to the FATCA-CRS Rules, financial institutions in India are required to report tax information about account holders that are tax resident of U.S. and other foreign countries, to the CBDT/ Indian Government which will, in turn, relay that information to the US Internal Revenue Service (IRS) and governments of other foreign countries.

These developments have resulted in compliance and reporting obligations on Financial Institutions like Old Bridge MF. In relevant cases, information will have to be reported to tax authorities/appointed agencies. In this respect, Old Bridge MF would rely on the relevant information provided by its Registrar and would also use its discretion. Towards compliance, the Fund may also be required to provide information to any institutions such as withholding agents for the purpose of ensuring appropriate withholding from the account or any proceeds in relation thereto. Old Bridge MF may also have to comply with other similar laws as and when applicable.

Prospective investors and Unit holders will therefore be required to comply with the request of the Fund to furnish such information / documentation / declarations as and when deemed necessary by the Investment Manager in accordance with Applicable Laws. In case prospective investor / Unit holder fails to furnish the relevant information / documentation / declarations in accordance with Applicable Laws, the Fund reserves the right to reject the application or redeem the Units held directly or beneficially and may also require reporting of such accounts and/or levy of withholding

tax on payments made to the Unit holders / investor and/or take any other action/s in accordance with Applicable Laws. FATCA-CRS provisions are relevant not only at on-boarding stage of Unit holders but also throughout the life cycle of investment with the Fund. Unit holders therefore should intimate to the Fund/the Investment Manager, any change in their status with respect to any FATCA-CRS related information / documentation / declarations provided by them previously, including but not limited to any declarations provided in respect of residency of the Unit holders for tax purposes promptly, i.e. within 30 days. Further, if the Fund and/or the Investment Manager is required by Applicable Laws, to provide information regarding the Fund and/or the unit holders / investors to any regulatory authority and/or the Fund Investments and/or income therefrom, and the Fund and/or the Investment Manager complies with such request in good faith, whether or not it was in fact enforceable, they shall not be liable to the Unit holders / investors or to any other party as a result of such compliance or in connection with such compliance.

Prospective investors / Unit holders should consult their own advisors to understand the implications of FATCA-CRS provisions/requirements. Please note that Old Bridge MF will be unable to provide advice to any investor or counterparty about their tax status or FATCA/CRS classification relevant to their account. It is the responsibility of the investor or counterparty to ensure that they record their correct tax status / FATCA/ CRS classification. Investor/ counterparty may seek advice from their tax advisor in this regard. The onus to provide accurate, adequate and timely inputs in this regard would be that of the investor or counterparty. Any changes in earlier information provided must be intimated within 30 days of such change.

Investors are requested to provide all the necessary information / declarations to facilitate compliance, considering India's commitment to implement CRS and FATCA under the relevant international treaties.

B. DEFAULT SCENARIOS AVAILABLE TO INVESTORS UNDER PLANS/ OPTIONS OF THE SCHEME.

1. Plans under the Scheme:

In terms of Para 2.5 of the Master Circular, direct investments by investors, viz. where the investment is not routed through distributors but made directly by the investors, are required to have a separate plan (i.e. Direct Plan) and a separate NAV. Expenses such as distribution expenses, brokerage or commission payable to distributors will not be charged to the investment made via direct investment and hence the Direct Plan will have a lower expense ratio.

Accordingly the Schemes have two Plans - Regular Plan & Direct Plan*, with a common portfolio and separate NAVs. Regular Plan is for investors who wish to route their investment through any distributor. Direct Plan is for investors who wish to invest directly without routing the investment through any distributor.

* Direct Plan: Brokerage / Commission paid to distributors and distribution expenses will not be charged under the Direct Plan. Direct Plan is only for investors who purchase /subscribe Units in a Scheme directly with the Mutual Fund and is not available for investors who route their investments through a

Distributor. Investors may please note that the Direct Plan under the Scheme is meant for investors who understand the capital market, mutual funds and the risks associated therewith. The risks associated with the investments in the schemes of mutual funds may vary depending upon the investment objective, asset allocation and investment strategy of the Schemes and the investments may not be suited for all categories of investors. The AMC believes that investors investing under the Direct Plan of the Scheme are aware of the investment objective, asset allocation, investment strategy, risks associated therewith and other features of the Scheme and has taken an informed investment decision.

VIII. INVESTMENT VALUATION NORMS FOR SECURITIES AND OTHER ASSETS

The Securities and Exchange Board of India (SEBI) has established Investment Valuation Norms and Accounting Policies in accordance with the SEBI (Mutual Funds) Regulations, 1996, which have been amended over time. The Eighth Schedule of the regulations (regulation 47) and circulars issued by SEBI describe the norms, methodology, and guiding principles for determining the value of investments held by Mutual Fund schemes. These Valuation Norms must be adhered to when evaluating securities.

As per Clause 6.1.3 of Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2023/74 dated May 19, 2023, the AMC has constituted an in-house valuation committee to review the systems and practices of valuation of securities.

Every year, the Valuation Committee review the investment policies. The Head – Compliance documents the results and conversations of the gathering. If there is a change to the current valuation policies, it should be suggested by the Valuation Committee and approved by the Board of Old Bridge Asset Management Private Limited (OBAMPL) and Old Bridge Mutual Fund Trustee Private Limited (OBMFTPL).

This policy outlines the procedures and manner to be used for determining the value of instruments and investments by OBAMPL. It further sets out the criteria to be utilized for accounting valuation., and it is subject to review and revision as needed.

I. EQUITY AND EQUITY RELATED SECURITIES

A. TRADED SECURITIES

1. Equity and Equity related securities:

OBAMPL has selected National Stock Exchange (NSE) will act as the Principal Stock Exchange for all of its equity and equity related securities held by the schemes. The Stock Exchange to be utilized for valuation is specified in the scheme offer document. When it comes to Index Funds, the Principal Stock Exchange will be the Exchange on which the benchmark index has been created.

- a) Traded securities shall be valued at the day's closing price on the NSE.
- b) When, on a particular day a security is not traded on NSE, the closing price of the security on the Bombay Stock Exchange Limited (BSE). Will be considered for valuation. When a security is not traded on any stock exchange on a particular valuation day, the value at which it was traded on the National Stock Exchange or the Bombay Stock Exchange, as the case may be, on the earliest previous day may be used, provided such date is not more than thirty days prior to the valuation date
- c) If the equity securities are not traded on any stock exchange for a period of thirty days prior to the valuation date, the scrip must be treated as 'non-traded' scrip and should be valued as non-traded security as per the norms given separately by us in Equity Section Non-Traded and also in case of equity securities not listed on any stock exchange, the scrip is to be valued as per the norms given separately in Equity Section Non-Traded.
- d) For Index Funds, valuation shall be done at the closing prices of the underlying index.

2. Derivatives – Equity/Index Options and Futures:

- a) Equity/Index Options
 - i. Market values of traded option contracts shall be determined with respect to the exchange on which it is contracted originally, i.e., if an option contracted on the NSE would be valued at the closing price on the NSE.
 - ii. The Exchanges give daily settlement prices in respect of all derivatives positions. These settlements prices would be adopted for valuing the positions, which are not traded.
- b) Equity/Index Futures
 - i. Market values of traded futures contracts shall be determined with respect to the exchange on which contracted originally, i.e., if futures position contracted on the NSE would be valued at the Settlement price on the NSE.
 - ii. The Exchanges give daily settlement prices in respect of all derivatives positions. These settlements prices would be adopted for valuing the positions, which are not traded.

B. NON-TRADED/THINLY TRADED SECURITIES

1. Application Money for Primary Market Issue:

Application money should be valued at cost up to 30 days from the closure of the issue or traded price whichever is earlier. If the security is not allotted / traded within 30 days from the closure of the issue, application money is to be valued as per the directives of valuation committee, which shall be ratified in the next board meeting. Rationale of valuing such application money should also be recorded.

2. Thinly Traded Equity/Non-Traded:

Thinly Traded:

When trading in an equity/equity related security (such as convertible debentures, equity warrants, etc.) in a month is both less than ₹ 5,00,000 and the total volume is less than 50,000 shares, it shall be considered as a thinly traded security and valued accordingly. In order to consider a security as a thinly traded security, the volumes traded only on the NSE and the BSE shall be considered.

If the share is not listed on the stock exchanges which provide such information, then it will be obligatory on the part of the Fund to make its own analysis in line with the above criteria to check whether such securities are thinly traded which would then be valued accordingly.

Further, thinly traded securities would be monitored on calendar month basis and not on rolling basis. i.e., If a security in holding has been classified as thinly traded according to the criteria mentioned above, it would be fairly valued ignoring the primary and secondary stock exchange prices. This fair valuation would continue for the entire month even though, the volumes and value might have exceeded the limit in the current month.

In case trading in an equity security is suspended for trading on the stock exchange up to 30 days, then the last traded price would be considered for valuation of that security. If an equity security is suspended for trading for more than 30 days, then it would be considered as non-Traded and valued accordingly.

Non-Traded:

If the equity securities are not traded on NSE and BSE for a period of thirty days prior to the valuation date, the scrip must be treated as 'non-traded' scrip.

Equity Shares:

Based on the latest available audited Balance Sheet, net worth shall be calculated as follows:

- i. Net Worth per share = [Share Capital + Reserves (excluding Revaluation Reserves) – Misc. expenditure and Debit Balance in P&L A/c] / No. of Paid-up Shares. This shall be computed based on the latest available audited balance sheet.
- ii. Average capitalization rate (P/E ratio) for the industry based upon either NSE or BSE data (which should be followed consistently and changes, if any noted with proper justification thereof) shall be taken and discounted by 75% i.e., only 25% of the industry average P/E shall be taken as capitalization rate (P/E ratio). Earnings per share (EPS) of the latest audited annual accounts will be considered for this purpose.
- iii. The value as per the net worth value per share and the capital earning value calculated as above shall be averaged and further discounted by 10% for thinly so as to arrive at the fair value per share.
- iv. In case the EPS is negative, EPS value for that year shall be taken as zero for arriving at capitalized earning.
- v. In case where the latest balance sheet of the company is not available within nine months from the close of the year, unless the accounting year is changed, the shares of such companies shall be valued at zero.
- vi. In case an individual security accounts for more than 5% of the total assets of the scheme, an independent valuer shall be appointed for the valuation of the said security.
- vii. To determine if a security accounts for more than 5% of the total assets of the scheme, it should be valued by the procedure above and the proportion which it bears to the total net assets of the scheme to which it belongs would be compared on the date of valuation.

Convertible Debentures:

In respect of convertible debentures and bonds, the non-convertible and convertible portion would be valued separately. The non-convertible portion would be valued on the same basis as is applicable to a debt instrument. The convertible component would be valued based on the same basis as would be applicable to an equity instrument.

If after conversion, the resultant equity instrument would be traded pari-passu with an existing equity instrument which is traded, the value of the later instrument can be adopted after an appropriate discount for the non-tradability of the instrument during the period preceding the conversion while valuing such instruments, the fact whether conversion is optional should also be factored in. The appropriate discount applied should be approved and factored in.

The value of the optional conversion shall be determined as follows:

- If the option to exercise rests with the issuer, the lower of the value when exercised or value when not exercised shall be taken.
- If the option to exercise rests with the investor, the higher of the value when exercised or value when not exercised shall be taken. The valuation shall be approved by the Valuation Committee.

3. Unlisted Equity:

These guidelines are similar to the guidelines issued by SEBI for non-traded / thinly traded securities mentioned above only except the following:

Computation of Net worth per share as lower of (a) and (b):

a)

- Net worth of the company = Paid up share capital + Reserves other than Revaluation reserve – Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses.
- Net worth per share = (Net worth of the company / Number of paid-up shares).

b)

- Net worth of the company = Paid up capital + Consideration on exercise of Option/Warrants received/receivable by the company + free reserves other than Revaluation reserve – Miscellaneous expenditure not written off or deferred revenue expenditure, intangible assets and accumulated losses.
- Net worth per share = (Net worth of the company / {Number of paid-up shares + number of shares that would be obtained on conversion/exercise of outstanding warrants and options}). If the net worth of the company is negative, the share should be marked down to Zero.

- c. The lower of (1) and (2) above shall be used for calculation of Net Worth per share and for further calculation in (c) below.
- d. Average capitalisation rate (P/E ratio) for the industry based upon either BSE or NSE data (which shall be followed consistently and changes, if any, noted with proper justification thereof) shall be taken and discounted by 75 per cent. i.e. only 25 per cent of the industry average P/E shall be taken as capitalisation rate (P/E ratio). Earnings per share (EPS) of the latest audited annual accounts will be considered for this purpose.

- Computation of fair value per share to be considered for valuation at 15 % discount for unlisted security

$$[(\text{Net worth per share} + \text{Capitalised value of EPS}) / 2] * 0.85$$

All calculations shall be based on audited accounts.

- In case the latest balance sheet i.e., balance sheet prepared within nine months from the close of the accounting year of the company, is not available (unless the accounting year is changed) the shares should be valued as zero.
- If the Net Worth of the company is negative, the share would be marked down to zero
- At the discretion of the AMC/valuation committee and with the approval of the trustees, unlisted equity scrip may be valued at a price lower than the value derived using the aforesaid methodology.

4. Suspended Security:

- In case trading in an equity security is suspended for trading on the stock exchange, the last traded price would be considered for valuation of that security upto 30 days.
- If an equity security remains suspended for trading on the stock exchange for more than 30 days, then it would be considered as non-traded and valued accordingly.

5. Non-Traded Rights Entitlements:

- a) Until they are traded, post the rights renunciation period, the value of the “rights” entitlement would be calculated as per the SEBI prescribed formula stated below:

$$V_r = n/m * (P_{ex} - P_{of})$$

where

V_r = Value of Rights

n = Number of rights offered

m = Number of original shares held

P_{ex} = Ex-right price

P_{of} = Rights Offer price

Ratio of Rights i.e. (n/m where n = No. of Rights offered and m = No. of original shares held) will be adjusted in the quantity directly while booking the Rights and hence not considered again for valuation.

- b) Where the rights are not treated pari-passu with the existing shares, suitable adjustments would be made to the value of rights. Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights would be valued at the renunciation value.
- c) In case original shares on which the right entitlement accrues are not traded on the Stock Exchange on an ex-right basis, right entitlement should not be recognised as investments.
- d) Where right entitlements are not traded and it was decided not to subscribe the rights, the right entitlements have to be valued at zero.
- e) In case the rights offer price is greater than the ex-rights price, the value of the rights share is to be taken as zero.
- f) Post Allotment of the rights entitlement, it will be valued in line with the normal valuation methodology for valuation of equities.

6. Non-Traded Warrants:

Warrants can be valued at the value of the share which would be obtained on exercise of the Warrant after applying appropriate discount as decided by valuation committee prorated on a monthly basis after reducing the exercise price / issuance price from the closing price of the underlying cash equity security.

If the amount payable on exercise of the warrants is higher than the value of the share, the value of the warrants should be taken as zero.

Value of warrant = (Value of underlying shares – exercise price).

7. Non-Traded Preference Shares:

Non-traded preference shares shall be valued in good faith depending upon the type of the preference Share and after considering illiquidity discount, if any. Valuation of non-traded preference shares would depend on the terms of issue of preference shares. i.e., convertible/non-convertible.

- Convertible preference shares should be valued like convertible debentures
- Non-convertible preference shares should be valued like non-convertible debentures.
- In case, dividend is not received, it would be treated as NPA.

8. Shares on De-merger

On de-merger following possibilities arise which influence valuation:

Both the shares are traded immediately on de-merger: In this case, shares of both the Companies are valued at respective traded prices.

Shares of only one company continued to be traded on de-merger: In case one entity is demerged into two or more entities and one of those entities continues to be listed, the value of unlisted entity(ies) will be difference between the closing price of the security on the ex-date (after demerger) and closing price of the security on previous trading day (before demerger) that continues to be listed. The difference in price of two dates will be the valuation price of the unlisted entity(ies) proportionately, till they are listed and traded on a stock exchange. The cost price of new entity/entities would be derived proportionately from the cost price of parent entity.

In case the value of the traded security of de-merged entity is equal to or in excess of the value of that entity before de-merger, then the security of the non-traded entity will be valued at zero.

In case an unlisted security is not listed within a period of 30 days from the ex-date, the valuation price derived for the demerged security will be reviewed on expiry of 30 days.

Both the shares are not traded on de-merger: The price of the shares of the Company one day prior to ex-date of de-merger will be bifurcated over the de-merged shares in the ratio of cost of shares of each demerged entity or on the basis of net assets transferred if the same is available from the Company and any other relevant factors.

In case shares of both the companies are not traded for more than 30 days, these are to be treated as unlisted security and valued accordingly.

On merger/demerger, in case the company specifies any regulations/ method for cost bifurcation or valuation the same will be adopted. In case the above methodology does not derive the fair valuation of de-merged entities; the same may be determined by the Valuation Committee on case-to-case basis.

Merger/ Amalgamation:

Valuation of resulting company would be determined by valuation of merging / amalgamating company immediately prior to the ex-date of merger / amalgamation

- In case merging / amalgamating companies being listed, valuation of resulting companies would be summation of valuation of entities immediately prior to merger date. Further if listed company merges into an unlisted surviving company, then the surviving company should be valued at the traded value of merging company immediately before merger.
- Example:

1. If Company A and Company B merge to form a new Company C then Company C would be valued at the price equals to A+B
2. If Company A which is a listed company merges into Company B which is an unlisted company would be valued at traded price of A immediately before merger.
 - In case, one of the merging / amalgamating companies being unlisted, valuation of resulting companies would be valued on the principles of fair valuation as guided by the valuation committee.
 - If the above companies remained unlisted for more than 3 months, illiquidity discount on the derived prices may be applied on the basis of the market capitalization of the issuer viz. at 5% ,10% and 15%, for Large cap, Mid cap, Small cap respectively.
 - In case of the above listed, Valuation committee may decide fair value other than guided above, post considering facts on a case to case basis. Further guidance from valuation committee would be sought for any exceptional cases not covered above.

9. Partly Paid-up Equity Shares:

Non-traded: Uncalled liability per share shall be reduced from the value of fully paid share, if traded, to derive price of non-traded partly paid shares.

If the fully paid-up shares are not traded, the valuation principles for valuing non- traded equity shares shall be followed for valuing the fully paid up on-traded shares (with suitable illiquidity discounts) and then reduced by the uncalled liability per share to arrive at the value of non-traded partly paid shares

Thinly Traded: Partly paid shares should be valued at the lower of the following two prices:

- Current closing price per share of fully paid-up shares less uncalled amount per share of partly paid shares, and,
- Closing price of the partly paid share if it has not been traded on any particular valuation day (not exceeding the last 30 days).

10. Infrastructure Investment Trust (InvIT) and Real Estate Investment (REIT):

- When units of InvITs and REITs are not traded on any stock exchange on a particular valuation day, the value at which these were traded on the selected stock exchange or any other stock exchange, as the case may be, on any day immediately prior to valuation day, shall be considered for valuation provided that such date is not more than thirty days prior to the valuation date.
- Where units of InvITs and REITs are not traded on any stock exchange for a continuous period of 30 days then the valuation for such units of InvITs and REITs will be determined by the Valuation Committee in consultation with the Internal Auditors or independent valuation agencies as deemed appropriate by the Valuation Committee from time to time.
- In addition to the above, if the valuation of units of InvITs and REITs is provided by the independent agency as approved by AMFI, AMC may get into an arrangement with such agency to provide security level price for Valuation.

11. To be listed equity shares and equity related instruments (pre-public offering):

Pending listing Such securities shall be valued as below:

- At cost, up to 2 months from the date of allotment.

However, in case a security is listed on more than one stock exchange, the AMC reserves the right to determine the stock exchange, the price of which would be used for the purpose of valuation of that security. The stock exchange once selected would be used consistently till changed by recording the reasons in writing by Board of AMC.

In case a security is not traded on valuation day, the last traded price/last available price would be used for valuation till T - 30 days. In case security is not traded for more than 30 days, the same would be valued on a fair value basis by the Valuation Committee of the AMC.

On the Valuation Day, all assets and liabilities denominated in foreign currency will be valued. The source for the price will be taken in the following order of preference: (a) FBIL, (b) Reuters, or (c) any other standard reference rate. In case any exchange rate is not available on the valuation day, the last available rate would be used for valuation.

The Trustees reserve the right to change the source for determining the exchange rate. The exchange gain / loss resulting from the aforesaid conversion shall be recognized as unrealized exchange gain / loss in the books of the Scheme on the day of valuation. Further, the exchange gain / loss resulting from the settlement of assets / liabilities denominated in foreign currency shall be recognized as realized exchange gain / loss in the books of the scheme on the settlement of such assets / liabilities.

The procedure for valuing investments in foreign equities is outlined as follows:

1. Select the most appropriate stock exchange for all equity and equity-related securities held by the schemes.
2. The closing prices of securities available will be taken for valuation. If these prices are unavailable, the last traded price will be considered
3. The following will be source for prices (a) Reuters, and for FX rate it will be FBIL / Reuters

In addition to the above the accounting / valuation for currency rates is given below:

1. When investing a certain portion of the fund overseas, the purchase of foreign currency will be accounted for as the cost of purchase, thus creating an FX position in the portfolio.
2. When investing in or selling securities, the record of the purchase or sale will be logged in the portfolio currency of Indian Rupees (INR). The cost of the purchase or sale, including brokerage and other fees, will be converted to INR at the agreed exchange rate.
3. At the time of settlement, the difference between the FX reference rate on the trade date and the actual FX rate used for settlement will be classified as a gain or loss due to fluctuation in foreign exchange.
4. Every day, when the closing prices and the currency rates are received, they will be applied to the portfolio, and the unrealized capital gain and FX gain will be calculated separately. The closing time for the currency rate will be 5.00 p.m., and the source for the price will be determined in the following order of preference: (a) RBI, (b) Reuters, or (c) any other standard reference rate.

Valuation of ADR/GDR

Mutual Fund can invest in ADRs/GDRs in line with the SEBI Circular dated September 1, 1999 and September 30, 1999. Exchange to be considered for valuation of ADRs/GDRs is to be approved by the AMC Board. Process of valuation would be as follows:

i. Receiving last quoted price

The closing prices of securities available will be taken for valuation. If these prices are unavailable, the last traded price will be considered

If the security is not traded on those days, the price of the previous day should be used, provided that the price is not more than 30 days old.

Thus, the closing prices of securities available will be taken for valuation. If these prices are unavailable, the last traded price from the following sources will be used: (a) FBIL, (b) Reuters, or (c) any other standard reference rate. In the event that no price is available on the valuation day, the last closing price will be used

ii. Converting the price in Indian Rupees (INR)

Conversion of ADR/GDR prices from foreign currency to Indian Rupees should be undertaken using the closing exchange rate of the date of valuation. The closing price in INR should then be used for valuation. As an alternative, the closing price of the security can be converted to INR at the closing exchange rate of the day on which the prices are considered. The source for the price will be the RBI, Reuters, or any other standard reference rate, in that order of preference.

5. Market Linked Debenture and all OTC Derivatives including Interest Rate SWAPS (IRS)/Forward Rate Agreements (FRA):

The convertible component should be valued on the same basis as would be applicable to an equity instrument. If, after conversion the resultant equity instrument would be traded pari passu with an existing instrument which is traded, the value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments, the fact whether the conversion is optional should also be factored in.

7. Illiquid Securities

Considering the same, in case an AMC decides to deviate from the valuation price given by the valuation agencies, the detailed rationale for each instance of deviation shall be recorded by the AMC.
- The rationale for deviation along-with details such as information about the security (ISIN, issuer name, rating etc.), price at which the security was valued I the price as per the valuation agencies and the impact of such deviation on scheme NAV (in amount and percentage terms) shall be reported to the Board of AMC and Trustees.

9. Money Market and Debt securities rated below Investment Grade/Default

- A money market or debt security shall be classified as “below investment grade” if the long-term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short-term rating of the security is below A3.
- A money market or debt security shall be classified as “Default” if the interest and / or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “Default” grade by a CRA. In this respect, Mutual Funds shall promptly inform

to the valuation agencies and the CRAs, any instance of non-receipt of payment of interest and / or principal amount (part or full) in any security.

Para 2.0 of SEBI Circular No. SEBI/HO/IMD/DF4/CIR/P/2019/41 dated March 22, 2019 provides for valuation of money market and debt securities at prices provided by the valuation agencies notified by AMFI. Till the time scrip level valuation is not available from the agency's securities are to be valued on the basis of indicative haircuts provided by the agencies. These haircuts shall be updated and refined as and when there is availability of material information which impacts the haircuts. During this period if there are trades in the security it may be considered for valuation if it is lower than the price post standard haircut. The minimum trade size in such cases will be determined by the valuation agencies.

The current indicative haircuts as determined by the valuation agencies and communicated by AMFI are:

For senior, secured securities

Rating/ sector	Infrastructure, Regal Estate, Hotels, Loan against shares and Hospitals	Other Manufacturing and Financial Institutions	Trading, Gems Jewellery and Others
BB	15%	20%	25%
B	25%	40%	50%
C	35%	55%	70%
D	50%	75%	100%

For subordinated, unsecured or both

Rating/ sector	Infrastructure, Regal Estate, Hotels, Loan against shares and Hospitals	Other Manufacturing and Financial Institutions	Trading, Gems Jewellery and Others
BB	25%	25%	25%
B	50%	50%	50%
C	70%	70%	70%
D	100%	100%	100%

In terms of the above circular, the determination of whether the rating is below investment grade will be performed by considering the most conservative rating on the instrument if it is rated by more than one rating agency.

The AMC may deviate from the indicative haircuts and/or the valuation price for money market and debt securities rated below investment grade provided by the valuation agencies subject to the following:

- i. The detailed rationale for deviation from the price post haircuts or the price provided by the valuation agencies shall be recorded by the AMC.
- ii. The rationale for deviation along with details such as information about the security (ISIN, issuer name, rating etc.), price at which the security was valued I the price post haircuts or the average of the price provided by the valuation agencies (as applicable) and the impact of such deviation on scheme NAV (in amount and percentage terms) shall be reported to the Board of AMC and Trustees.
- iii. The rationale for deviation along with details shall also be disclosed to investors under a separate head on the website. Further, the total number of such instances shall also be disclosed in the monthly and half-yearly portfolio statements for the relevant period along with an exact link to the website wherein the details of all such instances of deviation are available.

10. Changes in terms of Investment

While making any change to terms of an investment, Mutual Funds shall adhere to the following conditions:

- Any changes to the terms of investment, including extension in the maturity of a money market or debt security, shall be reported to valuation agencies and SEBI registered Credit Rating Agencies (CRAs) immediately, along with reasons for such changes.
- Any extension in the maturity of a money market or debt security shall result in the security being treated as “Default”, for the purpose of valuation.
- If the maturity date of a money market or debt security is shortened and then subsequently extended, the security shall be treated as “Default” for the purpose of valuation.
- Any put option inserted subsequent to the issuance of the security shall not be considered for the purpose of valuation and original terms of the issue will be considered for valuation.

11. Approach for traded and non-traded money market and debt securities

SEBI, vide circular no. SEBI/HO/IMD/DF4/CIR/P/2019/102 dated September 24, 2019 on Valuation of money market and debt securities, has laid down the broad principles for considering traded yields for the purpose of valuation of money market and debt securities. In this regard, the following are the areas identified for issuing standard guidelines.

- a. Waterfall mechanism for valuation of money market and debt securities
- b. Definition of tenure buckets for similar maturity
- c. Process for determination of similar issuer
- d. Recognition of trades and outlier criteria
- e. Process for construction of spread matrix

Part A: Valuation of Money Market and Debt Securities other than G-Secs

a) *Waterfall Mechanism for valuation of money market and debt securities:*

The following shall be the broad sequence of the waterfall for valuation of money market and debt securities:

- i. Volume Weighted Average Yield (VWAY) of primary reissuances of the same ISIN (whether through book building or fixed price) and secondary trades in the same ISIN
- ii. VWAY of primary issuances through book building of same issuer, similar maturity (Refer Note 1 below)
- iii. VWAY of secondary trades of same issuer, similar maturity
- iv. VWAY of primary issuances through fixed price auction of same issuer, similar maturity
- v. VWAY of primary issuances through book building of similar issuer, similar maturity (Refer Note 1 below)
- vi. VWAY of secondary trades of similar issuer, similar maturity.
- vii. VWAY of primary issuance through fixed price auction of similar issuer, similar maturity
- viii. Construction of matrix (polling may also be used for matrix construction)
- ix. In case of exceptional circumstances, polling for security level valuation (Refer Note 2 below)

Note 1

Except for primary issuance through book building, polling shall be conducted to identify outlier trades. However, in case of any issuance through book building which is less than INR 100 Cr, polling shall be conducted to identify outlier trades.

Note 2

Some examples of exceptional circumstance would be stale spreads, any event/news in particular sector/issuer, rating changes, high volatility, corporate action or such other event as may be considered by valuation agencies. Here stale spreads are defined as spreads of issuer

which were not reviewed/updated through trades/primary/polls in same or similar security/issuers of same/similar maturities in waterfall approach in last 6 months. Further, the exact details and reasons for the exceptional circumstances which led to polling shall be documented and reported to AMCs. Further, a record of all such instances shall be maintained by AMCs and shall be subject to verification during SEBI inspections.

Note 3

All trades on stock exchanges and trades reported on trade reporting platforms till end of trade reporting time (excluding Inter-scheme transfers) should be considered for valuation on that day.

Note 4

It is understood that there are certain exceptional events, occurrence of which during market hours may lead to significant change in the yield of the debt securities. Hence, such exceptional events need to be factored in while calculating the price of the securities. Thus, for the purpose of calculation of VWAY of trades and identification of outliers, on the day of such exceptional events, rather than considering whole day trades, only those trades shall be considered which have occurred post the event (on the same day).

The following events would be considered exceptional events:

- i. Monetary/ Credit Policy
- ii. Union Budget
- iii. Government Borrowing/ Auction Days
- iv. Material Statements on Sovereign Rating
- v. Issuer or Sector Specific events which have a material impact on yields
- vi. Central Government Election Days
- vii. Quarter end days

In addition to the above, valuation agencies may determine any other event as an exceptional event. All exceptional events along-with valuation carried out on such dates shall be documented with adequate justification.

b) Definition of tenure buckets for Similar Maturity

When a trade in the same ISIN has not taken place, reference should be taken to trades of either the same issuer or a similar issuer, where the residual tenure matches the tenure of the bond to be priced. However, as it may not be possible to match the exact tenure, it is proposed that tenure buckets are created and trades falling within such similar maturity be used as per table below.

Residual Tenure of Bond to be priced	Criteria of similar maturity
Upto 1 month	Calendar Weekly Bucket
< 1 month to 3 months	Calendar Fortnightly Bucket
< 3 months to 1 year	Calendar Monthly Bucket
< 1 year to 3 years	Calendar Quarterly Budget
< 3 years	Calendar Half-yearly or Greater Bucket

In addition to the above:

- i. In case of market events, or to account for specific market nuances, valuation agencies may be permitted to vary the bucket in which the trade is matched or to split buckets to finer time periods as necessary. Such changes shall be auditable. Some examples of market events / nuances include cases where traded yields for securities with residual tenure of less than 90 days and more than 90 days are markedly different even though both may fall within the same maturity bucket, similarly for less than 30 days and more

than 30 days or cases where yields for the last week v/s second last week of certain months such as calendar quarter ends can differ.

- ii. In the case of illiquid/ semi liquid bonds, it is proposed that traded spreads be permitted to be used for longer maturity buckets (1 year and above). However, the yield should be adjusted to account for steepness of the yield curve across maturities.
- iii. The changes/ deviations mentioned in clauses a and b, above, should be documented, along with the detailed rationale for the same. Process for making any such deviations shall also be recorded. Such records shall be preserved for verification.

c) Process for determination of similar issuer

Valuation agencies shall determine similar issuers using one or a combination of the following criteria. Similar issuer does not always refer to issuers which trade at same yields, but may carry spreads amongst themselves & move in tandem or they are sensitive to specific market factor/s hence warrant review of spreads when such factors are triggered.

- o Issuers within same sector/industry and/or
- o Issuers within same rating band and/or
- o Issuers with same parent/ within same group and/or
- o Issuers with debt securities having same guarantors and/or
- o Issuers with securities having similar terms like Loan Against Shares (LAS)/ Loan Against Property (LAP)

The above criteria are stated as principles and the final determination on criteria, and whether in combination or isolation shall be determined by the valuation agencies. The criteria used for such determination should be documented along with the detailed rationale for the same in each instance. Such records shall be preserved for verification. Similar issuers which trade at same level or replicate each other's movements are used in waterfall approach for valuations. However, similar issuer may also be used just to trigger the review of spreads for other securities in the similar issuer category basis the trade/news/action in any security/ies within the similar issuer group.

d) Recognition of trades and outlier criteria

i. Volume criteria for recognition of trades (marketable lot)

The following volume criteria shall be used for recognition of trades by valuation agencies:

Parameter	Minimum Volume Criteria for marketable lot	
Primary	₹ 25 Cr for both Bonds/NCD/CP/CD and other money market instruments	
Secondary	₹ 25 Cr for CP/CD, T-Bills and other money market instruments	
Secondary	₹ 5 Cr for Bonds/NCO/G-Secs	

ii. Outlier criteria

It is critical to identify and disregard trades which are aberrations, do not reflect market levels and may potentially lead to mispricing of a security or group of securities. Hence, the following broad principles would be followed by valuation agencies for determining outlier criteria.

- a. Outlier trades shall be classified on the basis of liquidity buckets (Liquid, Semi-liquid, Illiquid). Price discovery for liquid issuers is generally easier than that of illiquid

issuers and hence a tighter pricing band as compared to illiquid issuers would be appropriate.

- b. The outlier trades shall be determined basis the yield movement of the trade, over and above the yield movement of the matrix. Relative movement ensures that general market movements are accounted for in determining trades that are outliers. Hence, relative movement over and above benchmark movement shall be used to identify outlier trades.
- c. Potential outlier trades which are identified through objective criteria defined above will be validated through polling from market participants. Potential outlier trades that are not validated through polling shall be ignored for the purpose of valuation.
- d. The following criteria shall be used by valuation agencies in determining Outlier Trades

Liquidity Classification	Bps Criteria (Yield movement over Previous Day yield after accounting for yield movement of matrix)		
	Upto 15 days	15-30 days	< 30 days
Liquid	30 bps	20 bps	10 bps
Semi-liquid	45 bps	35 bps	20 bps
Illiquid	70 bps	50 bps	35 bps

The above criteria shall be followed consistently and would be subject to review on a periodic basis by valuation agencies and any change would be carried in consultation with AMFI.

- e. In order to ensure uniform process in determination of outlier trades the criteria for liquidity classification shall be as detailed below:

Liquidity classification criteria – liquid, semi-Liquid and Illiquid definition

Valuation agencies shall use standard criteria for classifying trades as Liquid, Semi-Liquid and illiquid basis the following two criteria

- Trading Volume
- Spread over reference yield

Such criteria shall be reviewed on periodic basis in consultation with AMFI.

Trading Volume (Traded days) based criteria:

Number of unique days an issuer trades in the secondary market or issues a new security in the primary market in a calendar quarter

- Liquid $\geq 50\%$ of trade days
- Semi liquid $\geq 10\%$ to 50% trade days
- Illiquid $< 10\%$ of trade days

Spread based criteria:

Spread over the matrix shall be computed and based on thresholds defined, issuers shall be classified as liquid, semi liquid and illiquid. For bonds thresholds are defined as upto 15 bps for liquid; $>15-75$ bps for semi-liquid; > 75 bps for illiquid. (Here, spread is computed as average spread of issuer over AAA Public Sector Undertakings/Financial Institutions/Banks matrix), For CP/ CD- upto 25 bps for liquid; $>25- 50$ bps for semiliquid; > 50 bps for illiquid. (Here, spread is computed as average spread of issuer over AI+/AAA CD Bank matrix).

The thresholds shall be periodically reviewed and updated having regard to the market.

The best classification (liquid being the best) from the above two criteria (trading volume and spread based) shall be considered as the final liquidity classification of the issuer. The above classification shall be carried out separately for money market instruments (CP/ CDs) and bonds.

e) *Process for construction of spread matrix*

Valuation agencies shall follow the below process in terms of calculating spreads and constructing the matrix:

Steps	Detailed Process
Step 1	Segmentation of corporates: The entire corporate sector is first categorised across following four sectors i.e., all the corporates will be catalogued under one of the below mentioned bucket: 1) Public Sector Undertakings/Financial Institutions/Banks; 2) Non-Banking Finance Companies -except Housing Finance Companies; 3) Housing Finance Companies; 4) Other Corporates
Step 2	Representative issuers – For the aforesaid 4 sectors, representative issuers (Benchmark Issuers) shall be chosen by the valuation agencies for only higher rating (i.e., “AAA” or AA+). Benchmark/Representative Issuers will be identified basis high liquidity, availability across tenure in AAA/AA+ category and having lower credit/liquidity premium. Benchmark Issuers can be single or multiple for each sector. It may not be possible to find representative issuers in the lower rated segments however, in case of any change in spread in a particular rating segment, the spreads in lower rated segments should be suitably adjusted to reflect the market conditions. In this respect, in case spreads over benchmark are widening at a better rated segment, then adjustments should be made across lower rated segments, such that compression of spreads is not seen at any step. For instance, if there is widening of spread of AA segment over the AAA benchmark, then there should not be any compression in spreads between AA and A rated segment and so on.
Step 3	Calculation of benchmark curve and calculation of spread – 1) Yield curve to be calculated for representative issuers for each sector for maturities ranging from 1 month till 20 years and above. 2) Waterfall approach as defined in Part A (1) above will be used for construction of yield curve of each sector. 3) In the event of no data related to trades/primary issuances in the securities of the representative issuer is available, polling shall be conducted from market participants 4) Yield curve for Representative Issuers will be created on daily basis for all 4 sectors. All other issuers will be pegged to the respective benchmark issuers depending on the sector, parentage and characteristics. Spread over the benchmark curve for each security is computed using latest available trades/primaries/polls for respective maturity bucket over the Benchmark Issuer. 5) Spreads will be carried forward in case no data points in terms of trades/primaries/polls are available for any issuer and respective benchmark movement will be given
Step 4	1) The principles of VWAY, outlier trades and exceptional events shall be applicable while constructing the benchmark curve on the basis of trades/primary issuances. 2) In case of rating downgrade/credit event/change in liquidity or any other material event in Representative Issuers, new Representative Issuers will

	<p>be identified. Also, in case there are two credit ratings, the lower rating to be considered.</p> <p>3) Residual tenure of the securities of representative issuers shall be used for construction of yield curve.</p>
--	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Part B: Valuation of G-Secs (T-Bill, Cash management bills, G-Sec and SOL)

The following is the waterfall mechanism for valuation of Government securities:

- VWAY of last one hour, subject to outlier validation
- VWAY for the day (including a two quote, not wider than 5 bps on NDSOM), subject to outlier validation
- Two quotes, not wider than 5 bps on NDSOM, subject to outlier validation
- Carry forward of spreads over the benchmark
- Polling etc.

Note:

1. VWAY shall be computed from trades which meet the marketable lot criteria stated in Part A of these Guidelines.
2. Outlier criteria: Any trade deviating by more than +/- 5 bps post factoring the movement of benchmark security shall be identified as outlier. Such outlier shall be validated through polling for inclusion in valuations. If the trades are not validated, such trades shall be ignored.

The aforesaid provisions related to Waterfall approach for valuation of debt and money market securities prescribed by SEBI circular dated September 24, 2019 and AMFI circular dated November 18, 2019 shall be effective from the date of implementation of the requirements of the circular by the Valuation agencies.

12. Treatment of upfront fees on trades

- Upfront fees on all trades (including primary market trades), by whatever name and manner called, shall be considered by the valuation agencies for the purpose of valuation of the security.
- Details of such upfront fees shall be shared by the AMCs on the trade date to the valuation agencies as part of the trade reporting to enable them to arrive at the fair valuation for that date.
- For the purpose of accounting, such upfront fees shall be reduced from the cost of the investment in the scheme that made the investment.
- In case upfront fees are received across multiple schemes, then such upfront fees shall be shared on a pro-rata basis across such schemes.

13. Investment in partly paid debentures

- a) Mutual Fund schemes shall make investment in partly paid debentures only when payment of the remaining amount is linked to clear, pre-defined events (i.e., is subject to conditions precedent). For avoidance of doubt any event which is purely time based shall not be considered as a pre-defined event. Such conditions precedent should be clearly outlined in the Agreement for subscription of the debentures/ Offer Document for the issue, as the case may be. Conditions precedent mean the clearly defined obligations/ events that need to be fulfilled before calling upon the investor to make payment for the remaining portion of the subscription. Such obligations/ events, to name a few, could include achievement of certain milestones linked with the object for which the debentures were issued or linked to the enhancement of credit rating of the Issuer or linked to other financial or operating parameters of the Issuer or linked to

the happening of an event. AMCs shall not resort to the practice of investing in partly paid debentures without any condition precedent.

- There should not be any linkages across schemes while investing in partly paid debentures. For example: if the agreement for partly paid debentures also envisages investment in any other type of instrument such as a commercial paper, then the AMC should ensure that subscription to the residual part of the issue/ the investment in the other instrument is made by the scheme which made the original investment in partly paid debentures.
 - While investing in partly paid debentures, AMCs shall ensure that interest of one set of unitholders/ schemes is not compromised at the cost of another.
 - All regulatory limits have to be complied with at the time of each such part payment.
 - In order to avoid a situation where a MF scheme is unable to honor future part payments, AMCs should avoid excessive concentration in partly paid debentures.
- b) Any investment in partly paid debentures has to be disclosed in the monthly portfolio disclosures of the scheme. This should include, inter-alia, the amount that has been contracted but not yet paid by the scheme, the dates of such future pay-ins, triggers for future pay-ins as well as any other detail that in the fund house's view may be of material interest to its investors.

14. Valuation of stressed issuers and perpetual bonds

Financial stress on the issuer and capability to repay borrowings shall be reflected in valuation of securities from trigger date.

Maturity of all perpetual bonds shall be treated as 100 years from the date of issuance for the purpose of valuation.

15. Securities not covered under the current valuation policy

In case of securities purchased by mutual fund does not fall within the current framework of the valuation of securities then the mutual fund shall report immediately to AMFI regarding the same. Further, at the time of investment AMCs shall ensure that the total exposure in such securities does not exceed 5% of the total AUM of the scheme.

AMFI has been advised that the valuation agencies should ensure that the valuation of such securities gets covered in the valuation framework within six weeks from the date of receipt of such intimation from mutual fund.

In the interim period, till AMFI makes provisions to cover such securities in the valuation of securities framework, the mutual funds shall value such securities using their proprietary model which has been approved by their independent trustees and the statutory auditors.

16. Investment in new type of securities

Investment in new type of securities/assets by the Old Bridge MF scheme shall be made only after establishment of the valuation methodologies for such securities with the approval of the Board of the OBAMPL.

17. Inter-scheme transfers

a) Debt Securities:

- AMCs shall seek prices for IST of any money market or debt security (irrespective of maturity), from the valuation agencies.
- AMFI, in consultation with valuation agencies shall decide a turn-around-time (TAT), within which IST prices shall be provided by the agencies.
- If prices from the valuation agencies are received within the pre-agreed TAT, an average of the prices so received shall be used for IST pricing.
- If price from only one valuation agency is received within the agreed TAT, that price may be used for IST pricing.
- If prices are not received from any of the valuation agencies within the agreed TAT, AMCs may determine the price for the IST, in accordance with Clause 3 (a) of Seventh Schedule of SEBI (Mutual Funds) Regulations, 1996.

Clause 3 (a) - such transfers are done at the prevailing market price for quoted instruments on spot basis.

b) Equity Securities:

Inter-scheme transfer of equity securities would be affected at the prevailing spot market price of the security at the time the transfer is affected. For this purpose, at the time of affecting the inter-scheme transfer, a record of the prices for the security quoted in the relative stock exchange (i.e., NSE/BSE) or through the Bloomberg Terminal would be obtained, which would indicate the date, time and the currently quoted price. The price given in the quotation of the stock exchange would be the effective price for the inter-scheme transfer.

18. Review of valuation policies

The implemented valuation policies and procedures shall be regularly reviewed (at least once in a Financial Year) by an independent auditor to seek to ensure their continued appropriateness.

19. Consideration of price of same/similar securities

CRISIL and ICRA shall consider the price of same/similar securities under Scrip Level Valuation as per the methodology discussed and agreed with the AMFI.

20. Inter-day NAV computation methodology in case of debt ETF

SEBI, vide circular no. SEBI/HO/IMD/IMD-I/DOF5/P/CIR/2021/0606 dated 30 July 2021 has clarified that for transactions by Authorised Participants / Large investors, directly with AMCs, intra-day NAV, based on the executed price at which the securities representing the underlying index or underlying commodity(ies) are purchased / sold, shall be applicable.

Refer Annexure-1 for detailed Intra-day NAV computation methodology in case of Debt ETF.

21. Abnormal Events

Following are the illustrative types of events which could be classified as Abnormal situations and market disruptions where current market information may not be obtainable / adequate for valuation of securities: -

- Significant volatility in the capital markets.
- Natural disasters or public disturbances that force the markets to close unexpectedly.
- Major policy announcements by the Central Bank, the Government or the Regulator.
- Large redemptions.

Valuation Committee shall be responsible for monitoring abnormal situations. Under above mentioned abnormal situations and market disruptions, Valuation Committee shall seek the guidance of the OBAMPL Board/committee of the Board of Directors appointed for this purpose in deciding the appropriate methodology for Valuation of affected securities. Any such abnormal situations shall be reported to the board of the AMC at the subsequent meeting.

If the above-mentioned policies and procedures of valuation do not result in fair/ appropriate valuation, the Old Bridge Asset Management Private Limited shall deviate from the above-mentioned policies and procedures in order to value the assets/securities at fair value.

Any deviation from the disclosed valuation policy and procedures may be with appropriate reporting to Board of Trustees and the Board of the Asset Management Company and appropriate disclosures to investors.

ANNEXURE - 1

INTRA-DAY NAV COMPUTATION METHODOLOGY IN CASE OF DEBT ETF

OBAMPL shall follow the following procedure to compute the intra-day NAV of Debt ETF as per aforesaid circular. The same will be applicable for all ongoing subscription/redemption transactions received through Authorized Participants and Large Investors.

1. OBAMPL will execute the trade in index/similar securities (subject to regulatory limits) for valid large investor / Authorised participant transactions.
2. Trade shall be executed for the entire basket subscribed/redeemed by investor.
3. Executed trade value (at clean price) (brokerage and other transaction charges shall be appropriately adjusted) will be considered to compute the Intra-day NAV for the transaction.
4. In case of executed trade settlement at T+1 or more, the interest accrual amount shall be recovered/paid from/to investor from the trade date to settlement date.
5. Cash component will be the difference of number of basket subscribed/redeemed by investor, multiplied by value of per unit creation size as per previous day's NAV and total market value of securities (as per previous day's valuation prices) executed on the date of transaction.
6. The sum of amounts as mentioned in point 3, 4 and 5 will be divided by number of units subscribed/redeemed by investor to arrive at Intra-day NAV applicable for the transaction.
7. Additionally, Old Bridge Mutual Fund shall also recover the statutory levy and incidental charges, if any pertain to transaction from the investor.
8. In case of trade execution in new security (new in Mutual Fund universe) where previous day's SLV prices are not available, shall be obtained from valuation agencies to compute previous day's market value for executed securities. In case price is received from one valuation agency only, such price

will be considered. Trade executed price will be used in case if previous day's valuation prices are not received from both the valuation agencies.

COMPUTATION OF NAV

A. POLICY FOR COMPUTATION OF NAV

A mutual fund's NAV is an indicator of its market value. Therefore, NAV can be viewed to assess the current performance of a mutual fund. It is mandatory, as per SEBI guidelines, that all mutual funds publicly display their NAV by updating it on the AMC & AMFI website on every business day.

The AMC will calculate and disclose the first NAV of the newly launched scheme not later than 5 Business Days from the allotment of Units. Subsequently, the Net Asset Value (NAV) per Unit of the Scheme will be computed and disclosed at the close of every Business Day. The NAV of the scheme is computed by dividing the net assets of the Scheme by the number of Units outstanding under the Scheme on the valuation date. The AMC will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time. In case of any conflict between the Principles of Fair Valuation and valuation guidelines specified by SEBI, the Principles of Fair Valuation shall prevail. The NAV's are declared after reducing the expense ratio as there are various expenses involved with respect to mutual fund scheme. The expense ratio includes management fees charges, operating costs, transfer agent costs, custodian and audit charges, and distribution and marketing expenses amongst others. NAV of Units of under the Scheme shall be calculated as shown below:

NAV (Rs.) per unit = (Market or Fair Value of the Scheme's Investments + Current Assets - Current Liabilities and Provisions) / No. of Units outstanding under each Scheme.

B. POLICY FOR COMPUTATION OF NAV IN FOREIGN SECURITIES

Please refer to the provisions of Valuation of Investment made in Foreign Equity mentioned in Statement of Additional Information.

C. PROCEDURE IN CASE OF DELAY IN DISCLOSURE OF NAV

The AMC shall update the NAVs on its website www.oldbridgemma.com and of the Association of Mutual Funds in India - AMFI (www.amfiindia.com) before 11.00 p.m. on every Business Day. Further, AMC shall extend the facility of sending latest available NAVs to unitholders through SMS, upon receiving a specific request in this regard.

In case of any delay, the reasons for such delay would be explained to AMFI in writing. If the NAVs are not available before the commencement of Business Hours on the following day due to any reason, the Mutual Fund shall issue a press release giving reasons and explaining when the Mutual Fund would be able to publish the NAV.

12. Gift Facility

The Unitholder can, at any time after the allotment of Units, write to the ISC, requesting for a Gift Form to gift his/her Units by way of a transfer of Units to the extent permitted under the SEBI (MF) Regulations, 1996/applicable law(s) to a person eligible to be an investor as per the terms of the SID. The Mutual Fund may arrange to transfer the Units in accordance with the terms of the Gift Deed executed by the donor Unit holder out of his/her Unit balance in accordance with applicable law(s) and subject to the compliance with such documentary requirements by the donor Unitholder to the satisfaction of the Mutual Fund/AMC if the donee is otherwise eligible to hold units of mutual funds. Gift in favour of a NRI/PIO/OCI/QFI will be subject to permission, general or specific, as per the applicable laws under the Foreign Exchange Management Act, 1999. The transfer of unitholdings to the donee in accordance with the terms of the Gift Deed and a receipt thereof shall be a valid discharge of the AMC/Mutual Fund of its obligations towards the donor Unitholder. The donor Unitholder agrees to be liable/responsible for any loss that may result from a transfer of Units thereof made in good faith by the AMC/ Mutual Fund at the request of the Donor Unitholder/s. The facility of gifting of Units is not permitted if the Units are held in electronic/demat mode.

13. Pledge/Lien of Units

The Units standing to the credit of the Unit holder under the Scheme(s) (subject to completion of Lock-in Period, if any) may be offered by the Unitholder as security in favour of scheduled banks, financial institutions, nonbanking finance companies (NBFC's) or any other persons ("Lender") subject to applicable SEBI Regulations and other laws, provided such Lenders are eligible to hold the Units. Upon a specific authorisation request made by the Unitholder (to be signed by all Unitholders, in case the mode of holding is joint or either-or survivor) and completion of necessary documentary formalities, the Mutual Fund/AMC will instruct the Registrar to mark a pledge/lien on the Units in favour of the Lender on the Units as may be requested by the Unitholder. A standard form for this purpose is available on request from any of the ISCs. Disbursement/sanctioning of loans/facilities will be at the sole discretion of the Lender and the Mutual Fund/AMC assumes no responsibility thereof. The Unitholder will not be able to redeem/switch-out the Units that are pledged/lien marked in favour of the Lender until the Mutual Fund/AMC receives a written authorization from the Lender that the Unitholder has been absolved of the financial obligations and that the pledge/lien may be removed/vacated. As long as the Units are pledged/lien marked, the Lender will have complete authority to redeem/transact in respect of such Units. If by enforcing the pledge/lien, the Lender seeks to transfer the Units in its own name, then in such event the Mutual Fund/AMC shall be obliged to comply with the said request, provided the Lender or such other entity, as the case may be, is eligible to hold the units and all the necessary documentary evidence is made available to the satisfaction of the Mutual Fund/AMC. Upon such transfer, the Mutual Fund/ AMC shall be discharged of all its liabilities in respect of the Units towards the Unitholder. An intimation of the invocation of the pledge/lien will be sent to the Unitholder. The Mutual Fund/AMC thereafter shall not be responsible for any claims made and/or losses incurred by the Unitholder and/or any third party in this regard. In case the Units of close-ended scheme are under pledge/lien, then at the time of maturity of the scheme if the Units are still under pledge/lien, then on

the failure to receive any instructions from the Lender and the Unitholder, the Mutual Fund/AMC reserves the right to pay the maturity proceeds to the Unitholder, post intimation of such payment to the Lender, and AMC/Mutual Fund shall not be liable/responsible for any loss incurred by the Lender and/or the Unitholder on account of such payment. The AMC/Mutual Fund shall also not be liable/responsible for any delay in payment of the maturity proceeds in such an event. Upon such payment, the Mutual Fund/AMC will be discharged of all its liabilities towards such Unitholder. The distribution of income in the nature of IDCW payouts declared on Units under pledge/lien shall always be paid to the Unitholder. The Mutual Fund/AMC reserves the right to change the operational guidelines for this facility offered by the AMC from time to time.

3. Dematerialisation and Rematerialisation procedures

1) Application for allotment of units in Demat mode

Investors shall have an option to receive allotment of Mutual Fund units in their demat account while subscribing to the Units of the Scheme in terms of the guidelines/ procedural requirements as laid by the Depositories from time to time. Investors desirous of having the Units of the Scheme in dematerialized form should contact the ISCs of the AMC/Registrar. Where units are held by investor in dematerialized form, the demat statement issued by the Depository Participant would be deemed adequate compliance with the requirements in respect of dispatch of statements of account.

2) Process to convert the units held in SoA mode to Demat mode

In case investors desire to convert their existing physical units (represented by statement of account) into dematerialized form or vice versa, the request for conversion of units held in physical form into Demat (electronic) form or vice versa should be submitted along with a Demat/Remat Request Form to their Depository Participants. In case the units are desired to be held by investor in dematerialized form, the KYC performed by Depository Participant shall be considered compliance of the applicable SEBI norms.

3) Process to convert the units held in Demat mode to Remat mode

If an investor wishes to get back the units in physical form, one needs to submit "Rematerialisation Request Form" in prescribed format to the DP. After necessary verification of records, the DP will forward the request through the respective Depository System to the Mutual Fund/ RTA . The MF/RTA will then print the SOA and dispatch the same to the registered address of the investor. The applicable rematerialisation charges if any, is payable to the DP for the said services.

4) Process to redeem the units held in Demat mode

Redemption requests for units held in demat mode must be submitted to DP or through Stock Exchange Platform, as applicable. One needs to submit a duly filled in Redemption Form (RF) to the DP. After necessary checking, the DP will forward the request to the concerned AMC/ RTA. In case the request is found valid, the redemption amount will be credited to the registered bank account of the investor directly by the AMC/RTA. In case of redemption of MF units through the stock broker, one needs to submit a Delivery Instruction Slip to the DP to transfer the Mutual Fund units to the designated CM pool account of the NSE Clearing limited / Indian Clearing Corporation Limited.

5) Switch-transaction permissible if the units are held in Demat

Switch transactions for units held in demat are processed through exchange/clearing corporation. The mechanism is same equivalent to redemption and subscription. Post processing of switch-out (redemption), switch-in (subscription) is processed and equivalent units are settled to clearing house for on-ward credit to the investor's DP account.

6) The procedure for change in investor's profile / bank account details etc. in respect of units held in demat mode (i.e., To whom the investor is required to approach, in case of such requests).

Any modifications of bank account, address, contact details etc in the demat folios, the investor needs to update through their respective Depository Participant (DP) for updation in demat account. DP follows prescribed guidelines for such profile modifications as formulated by respective Depositories (NSDL/CDSL) in their operating manual.

4. ASBA Disclosures

Additional mode of payment through Applications Supported by Blocked Amount (ASBA) facility:

Pursuant to SEBI Master Circular for Mutual Funds dated May 19, 2023 as amended from time to time (Master Circular) clause 14.8, an investor can subscribe to the New Fund Offer (NFO) through ASBA facility by applying for the Units offered under the Option(s)/Plan(s) of the Scheme(s) in the ASBA Application Form and following the procedure as prescribed in the form. ASBA is an application containing an authorization given by the Investor to block the application money in his specified bank account towards the subscription of Units offered during the NFO of the Scheme of Old Bridge Mutual Fund. Thus, for an investor who applies through ASBA facility, the application money towards the subscription of Units shall be debited from his specified bank account only if his/her application is selected for allotment of Units.

Benefits of Applying through ASBA facility:

1. Writing cheques and demand drafts is not required, as investor needs to submit ASBA application Form accompanying an authorization to block the account to the extent of application money towards subscription of Units. The balance money, if any, in the account can be used for other purposes by the investors.
2. Release/Unblocking of blocked funds after allotment is done instantaneously.
3. Unlike other modes of payment, ASBA facility prevents the loss of interest income on the application money towards subscription of Units as it remains in the bank account of the investor till the allotment is made.
4. Refunds of money to the investors do not arise as the application money towards subscription of Units gets blocked only on the allotment of Units.
5. The investor deals with the known intermediary i.e. his/her own bank.
6. The application form is simpler as the application form for ASBA will be different from the NFO application form.

ASBA Procedure:

1. An Investor intending to subscribe to the Units of the NFO through ASBA, shall submit a duly completed ASBA Application Form to a Self-Certified Syndicate Bank (SCSB), with whom his/her bank account is maintained.
2. The ASBA Application Form towards the subscription of Units can be submitted through one of the following modes
 - i. Submit the form physically with the Designated Branches (DBs) of the SCSB ("Physical ASBA"); or
 - ii. Submit the form electronically through the internet banking facility offered by the SCSB ("Electronic ASBA").
3. An acknowledgement will be given by the SCSB in the form of the counter foil or specifying the application number for reference. Such acknowledgement does not guarantee, in any manner that the investors will be allotted the Units applied for.
4. If the bank account specified in the ASBA Application Form does not have sufficient credit balance to meet the application money towards the subscription of Units, the Bank shall reject the ASBA Application form.
5. On acceptance of Physical or Electronic ASBA, the SCSB shall block funds available in the bank account specified to the extent of the application money specified in the ASBA Application Form.
6. The application money towards the Subscription of Units shall be blocked in the account until (i) Allotment of Units is made or (ii) Rejection of the application or (iii) Winding up of the Scheme, as the case may be.
7. SCSBs shall unblock the bank accounts for (i) Transfer of requisite money to the Mutual Fund / Scheme bank account against each valid application on allotment or (ii) in case the application is rejected.

8. The list of SCSBs and their DBs where ASBA application form can be submitted is available on the websites of BSE (www.bseindia.com), NSE (www.nseindia.com) and SEBI (www.sebi.gov.in) and shall also be given in the ASBA application form of respective schemes.

Note: No request for withdrawal of ASBA application form made during the NFO Period will be allowed.

Grounds for Technical Rejections of ASBA application forms:

ASBA Application Forms can be rejected, at the discretion of Registrar and Transfer Agent of Old Bridge Mutual Fund or SCSBs including but not limited on the following grounds:-

1. Applications by persons not competent to contract under the Indian Contract Act, 1872, including but not limited to minors, insane persons etc.
2. Mode of ASBA i.e. either Physical ASBA or Electronic ASBA, not selected or ticked.
3. ASBA Application Form without the stamp of the SCSB.
4. Application by any person outside India if not in compliance with applicable foreign and Indian laws.
5. Bank account details not given/incorrect details given.
6. Duly certified Power of Attorney, if applicable, not submitted along with the ASBA application form.
7. No corresponding records available with the Depositories matching the parameters namely (a) Names of the ASBA applicants (including the order of names of joint holders) (b) DP ID (c) Beneficiary account number or any other relevant details pertaining to the Depository Account.

Mechanism for Redressal of Investor Grievances:

All grievances relating to the ASBA facility may be addressed to the respective SCSBs, giving full details such as name, address of the applicant, number of Units applied for, counterfoil or the application reference given by the SCSBs, DBs or CBs, amount paid on application and the Designated Branch or the collection centre of the SCSB where the Application Form was submitted by the ASBA Investor. If the SCSB is unable to resolve the grievance, it shall be addressed to Investor Relations Officer of Old Bridge Mutual Fund

5. Portfolio Turnover Details

Portfolio turnover is defined as lesser of purchases and sales as a percentage of the average corpus of the Scheme during a specified period of time. In case of open-ended schemes, it is expected that there would be a number of subscriptions and redemptions on a daily basis. Consequently, it is difficult to estimate, with any reasonable measure of accuracy, the likely turnover in the portfolio(s). Active asset allocation would impact portfolio turnover.

Pursuant to SEBI Master Circular no. SEBI/HO/OIAE/OIAE_IAD-1/P/CIR/2023/145 dated August 11, 2023, a common Online Dispute Resolution ('ODR') Portal has been introduced. The ODR Portal allows investors with additional mechanism to resolve the complaints/disputes through online conciliation and online arbitration for resolution of disputes arising in the Indian Securities Market. Investors can register

complaints/disputes against all Market Participants for resolution on the Online Dispute Resolution ('ODR') Portal i.e. <https://smartodr.in/login>.

For the purpose of aforesaid SEBI circular, Old Bridge Asset Management Private Limited ('the AMC') comes under the ambit of specified intermediaries / regulated entity of the securities market, referred to as "Market Participant" and accordingly, the AMC has enrolled itself on the ODR Portal. In this regard, investors are requested to note the following:

1. An investor shall first take up his/her/their grievance with the AMC by lodging a complaint directly with the AMC. If the grievance is not redressed satisfactorily, the investor may, in accordance with the SCORES guidelines, escalate the same through the SCORES Portal in accordance with the process laid out therein. After exhausting these options for resolution of the grievance, if the investor is still not satisfied with the outcome, he/she/they can initiate dispute resolution through the ODR Portal.
2. Alternatively, the investor can initiate dispute resolution through the ODR Portal if the grievance lodged with the AMC was not satisfactorily resolved or at any stage of the subsequent escalations mentioned in the paragraph 1 above (prior to or at the end of such escalation/s). The AMC may also initiate dispute resolution through the ODR Portal after having given due notice of at least 15 calendar days to the investor for resolution of the dispute which has not been satisfactorily resolved between them.
3. Disputes between Investors and the AMC (including for any complaints/disputes arising on account of Mutual Fund Distributors of the Fund / AMC) arising out of latter's activities in the securities market, will be resolved in accordance with the aforesaid circular and by harnessing online conciliation and/or online arbitration as specified in the aforesaid circular. The AMC or the investors (or holders on account of nominations or transmission being given effect to) may also refer any unresolved issue of any service requests / service-related complaints for due resolution by harnessing online conciliation and/or online arbitration as specified in the aforesaid circular.
4. The dispute resolution through the ODR Portal can be initiated when the complaint/dispute is not under consideration in terms of the paragraph 1 above or SCORES guidelines as applicable or not pending before any arbitral process, court, tribunal, or consumer forum or are non-arbitrable in terms of Indian law. The dispute resolution through the ODR Portal can be initiated when within the applicable law of limitation (reckoned from the date when the issue arose/occurred that has resulted in the complaint/date of the last transaction or the date of disputed transaction, whichever is later).
5. The ODR Portal has necessary features and facilities to, inter alia, enrol the investors and the AMC, to file the complaint/dispute and to upload any documents or papers pertaining thereto. Investors are requested to refer to aforesaid SEBI circular for details on conciliation and arbitration proceedings and associated fees and charges. The said circulars along with the link to ODR portal are also made available on our website www.oldbridgemf.com

G. INFORMATION PERTAINING TO INVESTMENTS BY THE SCHEMES OF THE FUND.

1. DERIVATIVE STRATEGIES (OLD BRIDGE FOCUSED EQUITY FUND)

Derivatives are financial contracts of pre-determined fixed duration, like stock futures/options and index futures and options, whose values are derived from the value of an underlying primary financial instrument such as: interest rates, exchange rates, commodities, and equities.

The objectives of the various strategies include earning option premium/ hedge stock / portfolio against market gyrations.

The risks associated with derivatives are similar to those associated with underlying investments. The additional risks of using derivative strategies could be on account of:

- Illiquidity;
- Potential mis - pricing of the Futures/Options;
- Lack of opportunity;

- Inability of derivatives to correlate perfectly with the underlying (Indices, Assets, Exchange Rates);
- Cost of hedge can be higher than adverse impact of market movements;
- An exposure to derivatives in excess of the hedging requirements can lead to losses;
- An exposure to derivatives can also limit the profits from a genuine investment transaction;
- The prices which are seen on the screen need not be the same at which execution will take place.

For detailed risks associated with use of derivatives, please refer paragraph “Scheme Specific Risk Factors”. Exchange traded derivatives Contracts in stocks and indices in India are currently cash settled at the time of maturity.

Derivatives allowed for mutual funds are only exchange traded and not OTC.

Concepts and Examples of derivatives which may be used by the fund manager:

Futures

Futures (Index & Stocks) are forward contracts traded on the exchanges & have been introduced both by BSE and NSE. Generally, futures of 1 month (near month), 2 months (next month) and 3 months (far month) are presently traded on these exchanges. These futures expire on the last working Thursday of the respective months.

Some strategies that employ stock futures and their objectives:

(a) Arbitrage

1. Selling spot and buying future: In case the Scheme holds the stock of a company “A” at say Rs. 100 while in the futures market it trades at a discount to the spot price say at Rs. 98, then the Scheme may sell the stock and buy the futures.

On the date of expiry of the stock future, the Scheme may reverse the transactions (i.e. buying at spot & selling futures) and earn a risk-free Rs. 2 (2% absolute) on its holdings without any dilution of the view of the fund manager on the underlying stock.

Further, the Scheme can still benefit from any movement of the price in the upward direction, i.e. if on the date of expiry of the futures, the stock trades at Rs. 110 which would be the price of the futures too, the Scheme will have a benefit of Rs 10 whereby the Scheme gets the 10% upside movement together with the 2% benefit on the arbitrage and thus getting a total return of 12%. The corresponding return in case of holding the stock would have been 10%.

2. Buying spot and selling future: Where the stock of a company “A” is trading in the spot market at Rs. 100 while it trades at Rs. 102 in the futures market, then the Scheme may buy the stock at spot and sell in the futures market thereby earning Rs. 2.

Buying the stock in cash market and selling the futures results into a hedge where the Scheme has locked in a spread and is not affected by the price movement of cash market and futures market. The arbitrage position can be continued till expiry of the future contracts when there is a convergence between the cash market and the futures market. This convergence enables the Scheme to generate the arbitrage return locked in earlier.

Risk: On the date of expiry, when the arbitrage is to be unwound, it is not necessary for the stock price and its future contract to coincide. There could be a discrepancy in their prices even a minute before the market closes. Thus, there is a possibility that the arbitrage strategy gets unwound at different prices.

(b) Buying/ Selling Stock future:

When the Scheme wants to initiate a long position in a stock whose spot price is at say, Rs.100 and futures is at 98, then the Scheme may just buy the futures contract instead of the spot thereby benefiting from a lower cost.

In case the Scheme has a bearish view on a stock which is trading in the spot market at Rs.98 and the futures market at say Rs. 100, the Scheme may subject to regulations, initiate a short position in the futures contract. In case the prices align with the view and the price depreciates to say Rs. 90, the

Scheme can square up the short position thereby earning a profit of Rs.10 vis- a-vis a fall in stock price of Rs. 8.

Risk: There is risk of not being able to correctly forecast future market trends or the value of assets, indices or other financial or economic factors in establishing derivative positions for the Scheme. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets. The extent of loss is the same as in the underlying stocks.

(c) **Hedging:**

The Scheme may use exchange-traded derivatives to hedge the equity portfolio. Stock futures and options may be used to hedge the stocks in the portfolio.

Risk: This may involve a basis risk where the instrument used as a hedge does not match the movement in the instrument/underlying asset being hedged. The risk may be inter-related also e.g. interest rate movements can affect equity prices, which could influence specific issuer/industry assets.

Option Contracts (Stock)

An Option gives the buyer the right, but not the obligation, to buy (call) or sell (put) a stock at an agreed-upon price during a certain period of time or on a specific date.

Options are used to manage risk or as an investment to generate income. The price at which underlying security is contracted to be purchased or sold is called the Strike Price. Options that can be exercised on or before the expiration date are called American Options while, Options that can be exercised only on the expiration date are called European Options.

Options Risk/Return Pay-off Table

	Stock Options	Buy Call	Sell Call	Buy Put	Sell Put
1	View on underlying	Positive	Negative	Negative	Positive
2	Premium	Pay	Receive	Pay	Receive
3	Risk Potential	Limited to premium paid	Unlimited	Limited to premium paid	Unlimited
4	Return Potential	Unlimited	Premium Received	Unlimited	Premium Received

Note: The above table is for the purpose of explaining concept of options contract. As per the current Regulations, the Scheme(s) cannot write option or purchase instrument with embedded write option except for the covered call strategy.

Option contracts are of following two types - Call and Put:

Call Option:

A call option gives the buyer, the right to buy specified quantity of the underlying asset at the set strike price on or before expiration date and the seller (writer) of call option however, has the obligation to sell the underlying asset if the buyer of the call option decides to exercise the option to buy.

Put Option:

A put option gives the buyer the right to sell specified quantity of the underlying asset at the set strike price on or before expiration date and the seller (writer) of put option however, has the obligation to buy the underlying asset if the buyer of the put option decides to exercise his option to sell.

Risk:

The options buyer's risk is limited to the premium paid. However the gains of an options writer are limited to the premiums earned. The exchange may impose restrictions on exercise of options and may also restrict the exercise of options at certain times in specified circumstances and this could impact the

value of the portfolio. The writer of a call option bears a risk of loss if the value of the underlying asset increases above the exercise price. The Scheme bears a risk that it may not be able to correctly forecast future market trends or the value of assets, indices or other financial or economic factors in establishing derivative positions for the Scheme.

Stock Options:

Stock options are termed to be an efficient way of buying / selling a stock compared to buying / selling a portfolio of physical shares representing an index for ease of execution and settlement. The participation can be done by buying / selling a call/put option.

The risk are also different when stock futures are bought/sold visa- a- vis stocks options as in case of a stock future there is a mark to market variation and the risk is much higher as compared to buying an option, where the risk is limited to the extent of premium paid.

The illustration below explains how one can gain using stock call / put option.

Call Option

Suppose an investor buys a Call option on 1 lot of "Stock A" (Lot Size: 50 units)

- "Stock A" 1 Lot Size: 50 units
- Spot Price (S): 17,500
- Strike Price (x): 17,600 (Out-of-Money Call Option)
- Premium: 100

Total Amount paid by the investor as premium $[50 \times 100] = 5,000$

There are two possibilities i.e. either the stock moves up over the strike price or remains below the strike price.

Case 1- The stock goes up

- An investor sells the Stock Option described above before expiry:

Suppose "Stock A" moves up to 17,600 in the spot market and the premium has moved to Rs 200 and there are 15 days more left for the expiry. The investor decides to reverse his position in the market by selling his 1 "Stock A" call option as the option now is In the Money.

His gains are as follows:

- "Stock A" Spot: 17,600
- Current Premium: Rs.200
- Premium paid: Rs.100
- Net Gain: $Rs.200 - Rs.100 = Rs.100$ per unit
- Total gain on 1 lot of "Stock A" (50 units) = $Rs. 5,000 (50 \times 100)$

In this case the premium of Rs.200 has an intrinsic value of Rs.100 per unit and the remaining Rs.100 is the time value of the option.

- An investor exercises the "Stock A" Option at expiry

Suppose "Stock A" moves up to 17,700 in the spot market on the expiry day and the investor decides to reverse his position in the market by exercising the "Stock A" call option as the option now is 'in The Money'.

His gains are as follows:

- "Stock A" Spot: 17,700
- Premium paid: Rs.100
- Exercise Price: 17,550
- Receivable on exercise: $17,700 - 17,550 = 150$ • Total Gain: $Rs. 2,500 \{(150 - 100) \times 50\}$

In this case the realised gain is only the intrinsic value, which is Rs.50, and there is no time value.

Case 2 - "Stock A" moves to any level below 17,550

Then the investor does not gain anything but on the other hand his loss is limited to the premium paid:

Net Loss is Rs. 5,000 (Loss is capped to the extent of Premium Paid)

(Rs 100 Premium paid * Lot Size: 50 units).

Put Option

Suppose an investor buys a Put option on 1 lot of "Stock A". • "Stock A" Lot Size: 50 units

- Spot Price (S): 17,500
- Strike Price (x): 17,450 (Out-of-Money Put Option)
- Premium: 30
- Total Amount paid by the investor as premium $[50 \times 30] = \text{Rs. } 1,500$

There are two possibilities i.e. either "Stock A" moves over the strike price or moves below the strike price.

Let us analyze these scenarios.

Case 1 - "Stock A" goes down

- An investor sells "Stock A" Option before expiry:

Suppose "Stock A" moves down to 17,400 in the spot market and the premium has moved to Rs. 80 and there are 15 days more left for the expiry. The investor decides to reverse his position in the market by selling his 1 "Stock A" Put Option as the option now is In The Money.

His gains are as follows:

- "Stock A" Spot: 17,400
- Premium paid: Rs.30
- Net Gain: $\text{Rs.}80 - \text{Rs.}30 = \text{Rs.}50$ per unit
- Total gain on 1 lot of "Stock A" (50 units) = $\text{Rs. } 2,500 (50 \times 50)$

In this case the premium of Rs.80 has an intrinsic value of Rs.50 per unit and the remaining Rs.30 is the time value of the option.

An investor exercises "Stock A" Option at expiry (It is an European Option)

Suppose "Stock A" moves down to 17,400 in the spot market on the expiry day and the investor decides to reverse his position in the market by exercising "Stock A" Put Option as the option now is In The Money.

His gains are as follows:

- "Stock A" Spot: 17,400
- Premium paid: Rs.30
- Exercise Price: 17,450
- Gain on exercise: $17,450 - 17,400 = 50$
- Total Gain: $\text{Rs. } 1,000 \{(50 - 30) \times 50\}$

In this case the realised amount is only the intrinsic value, which is Rs.50, and there is no time value in this case.

Case 2 - If "Stock A" stays over the strike price which is 17,450, in the spot market then the investor does not gain anything but on the other hand his loss is limited to the premium paid.

- "Stock A" Spot: $>17,450$
- Net Loss $\text{Rs.}1,500$ (Loss is capped to the extent of Premium Paid) ($\text{Rs } 30 \text{ Premium paid} \times \text{Lot Size: } 50 \text{ units}$).

Covered Call Strategy

The covered call strategy is a strategy where a fund manager writes call options against an equivalent long position in an underlying stock thereby giving up a part of the upside from the long position. The strategy allows the fund manager to earn premium income from the option writing in addition being able to capture the remaining part of the upside.

Illustration - Covered Call strategy using stock call options:

Suppose a fund manager buys equity stock of ABC Ltd. For Rs. 1000 and simultaneously sells a call option on the same stock at a strike price of Rs. 1100. The scheme earns a premium of say, Rs. 50.

Here, the fund manager does not think that the stock price will exceed Rs. 1100.

Scenario 1: Stock price exceeds Rs. 1100

The call option will get exercised and the fund manager will sell the stock to settle his obligation on the call at Rs. 1100 (earning a return of 10% on the stock purchase price). Also, the scheme has earned a premium of Rs. 50.

Net Gain -

$\text{Rs. } 1100 \text{ (strike price)} - \text{Rs. } 1000 \text{ (stock purchase price)} + \text{Rs. } 50 \text{ (premium earned)} = \text{Rs. } 150$

Scenario 2: Stock prices stays below Rs. 1100

The call option will not get exercised and will expire worthless. The premium earned on call option will generate alpha for the scheme.

Net Gain - $\text{Rs. } 50$ (premium earned).

Benefits of using Covered Call Strategy in Mutual Funds:

The covered call strategy can be followed by the Fund Manager in order to hedge risk thereby resulting in better risk adjusted returns of the Scheme. The strategy offers the following benefits:

a) Hedge against market risk - Since the fund manager sells a call option on a stock already owned by the mutual fund scheme, the downside from fall in the stock price would be lower to the extent of the premium earned from the call option.

b) Generating additional returns in the form of option premium in a range bound market. Thus, a covered call strategy involves gains for unit holders in case the strategy plays out in the right direction.

Risk associated with covered calls:

The risk associated with covered calls is the loss of upside, i.e. if the shares are assigned (called away), the option seller forgoes any share price appreciation above the option strike price. Please refer risk factors section on detail derivatives risk factors.

For details of risk factors relating to use of Derivatives, the investors are advised to refer to Scheme Specific Risk Factors:
